Package version: 3.7.0-0 Installation method: Not available (not installed by default) Default application menu: Not available (not installed by default) Time required to install: 5 to 15 minutes Time required to use: 1 to 2 minutes Minimum system requirements: Linux: Gnome: 1.4.2 or greater (Gnome 1.0.X is recommended but any version from 1.4.2 or greater will do) KDE: 1.0.2 or greater (KDE 1.0.X is recommended but any version from 1.0.2 or greater will do) Time required to use: This depends on what features you use. Version history: 3.6.1-1 - 24 August 2006 3.6.1-0 - 19 July 2006 3.6.0-1 - 25 May 2006 3.5.1-1 - 3 April 2006 3.5.0-0 - 26 December 2005 3.4.0-0 - 26 November 2005 3.3.0-0 - 25 September 2005 3.2.0-0 - 20 July 2005 3.1.0-0 - 11 May 2005 3.0.0-0 - 3 March 2005 2.6.2-0 - 12 February 2005 2.5.2-0 - 11 January 2005 2.5.1-0 - 5 January 2005 2.4.0-0 - 21 December 2004 2.3.0-0 - 20 December 2004 2.2.0-0 - 21 November 2004 2.1.0-0 - 20 October 2004 2.0.0-0 - 13 October 2004 1.2.0-0 - 19 July 2004 1.1.0-0 - 14 June 2004 1.0.0

What's New in the Illustrate?

Illustrate is a small application written in Qt that lets you draw whatever you want right on your desktop. What's New in This Release: - The application is written in Qt 4.5.0 - The current release is based on Qt 4.5.0 What's New in Qt: - Qt 4.5.0 is now released Notes: - This release builds using Qt 4.5.0. - If you wish to use the latest version of Qt, you should download the latest release of the source code from - If you wish to build the current release, please read the README file. - Try not to use.ui files as the images they produce can be a lot bigger than the images needed. For this reason, this application only uses resources provided by the "resources" subfolder of the application folder. It is recommended that you use Qt Creator to create your.ui files. Make sure to select the "custom" generator for all resources files. - All resources are placed in the "resources" subfolder of the application folder. - All application files are placed in the "app" subfolder of the application folder. How to build and run: To build the application, you need to have the Qt 4.5.0 pre-built framework installed on your system. Qt is available as an operating system's package or a redistributable package. If you are running on Linux, you should download the package called "libqt4-dev". If you are running on Windows, you should download the Windows installer package called "qt-win-4.5.0.exe". To run the application, simply double click on the "app" file that you have just created. If you wish to create new images, right click on the "app" icon on your desktop. Standalone and Run from the command line: To build this application as a standalone executable, you need to have Qt 4.5.0 installed on your system. If you are running on Windows, you should download the package called "qt-win-4.5.0.exe". The standard way to run this application is to use the command line. Run the application from your shell using the following command line:

System Requirements For Illustrate:
