Superpowers is an application developed to help you create 2D and 3D games in HTML5 A streamlined and easy to navigate interface Setting up the program is simple and straightforward, especially since all you need to do is select the location on your hard disk where you want to decompress the archive. Upon launch, you are required to set up your server, a task that you can quickly complete by leaving the default settings. You should keep in mind that you can share your server with other users whom you are collaborating with. Once your server is connected, you can double-click on it and start working on your first project. As you probably hinted, you can create a new project by clicking on the dedicated button, entering a name and a suitable description that allows you to identify it later on. Includes presets and assets to create your first game The application comes with a plethora of tools that enable you to create your first game, such as import spires, 3D models, sounds, build scenes, write scripts, so on and so forth. There is no order in which you need to create your project and you should keep in mind that you can rearrange the assets by dragging them around. Therefore, if you decided to change the script for an asset, then you can just move the corresponding folder so that the instructions are executed according to your exact order. Generally speaking, the program reads each script from top to bottom and inserting commands is a fairly simple task. In case you do not have too much experience with writing scripts, then you will be happy to learn that the utility can detect reference, type and syntax errors on the fly. Consequentially, if you notice that some of the words are in red and the script is not working properly, then you should not hesitate to check to analyze the detailed error messages at the bottom of the editor. A great utility for anyone who wants to get started with game development All in all, if you want to try your skills in 2D or 3D game development, then Superpowers provides you with a versatile and intuitive environment where you can create anything you set your mind to.
