I tried to do an update with composer: \$ composer update I got the following error: The HTTP message was not acceptable. The server may be overloaded. (error response code 500 (Internal Server Error)): What could be the cause of this problem and how can I fix it? I'm running the latest version on Windows 7. A: It's a current problem that has been reported on the composer issue tracker. As said in the comments on that issue, the problem is most likely related to a DDoS attack. Although the issue tracker is not empty, I don't think it is "the worse storm", and I don't think the issue is critical - [St. George's Hospital conjoined twins: report of a case]. We report the case of two conjoined twins who were treated at St. George's Hospital, Tokyo. The female twins, a boy and a girl, were born by elective cesarean section at 37 weeks' gestation, weighing 647 g and 642 g, respectively. There were two umbilical veins, two urinary bladders, a vagina, anus and a single umbilical artery. After birth, they developed omphalocele and intestinal malrotation. Inter-twin laparotomy revealed a pulmonary artery which originated from the right pulmonary artery, and a single ventricle heart. We could not find any communication between the twins or between the vascular structure of the twins and the amniotic sac. Esophagogastroduodenoscopy, cystoscopy and urine analysis were performed. They were also 3e33713323
